Revision 1

A The paragraphs of this essay are in the wrong order. Put them in the correct order by numbering them 1 to 4.

DESCRIBE A SPECIAL FESTIVAL OR CELEBRATION IN YOUR COUNTRY.

☐ For those three days there are processions of dancers and bands. Lorries drive slowly through the narrow streets carrying bands and sound systems. The music is very loud. Crowds of people stand on both sides of the streets watching the dancers and following them. The dancers have amazing costumes. You can see dancers dressed as birds, as ancient Egyptians, as flowers, as butterflies or even as flames. It's very colourful and there's lots to look at.

☐ About a million people come to Notting Hill Carnival every year. In fact, people call it Europe's biggest street party. The carnival takes place at the end of August in Notting Hill, in West London, but people from all over London join in. It's a Caribbean carnival with Caribbean music, dancing and food. It lasts three days - Saturday, Sunday and Monday.

☐ If you don't like crowds, you shouldn't go to Notting Hill Carnival. It's full of people and sometimes the streets are so crowded that you can't move. But if you want to dance in the streets, and enjoy a Caribbean celebration, this is the place for you.

☐ When you're tired of looking at dancers, you can try something at one of the food stalls. During carnival, there are lots of little stalls on the streets selling delicious hot and cold food. These stalls often have barbecues. Traditional carnival food includes coconuts, corn soup and barbecued chicken with rice and peas.

Test 2

A The paragraphs of this letter are in the wrong order. Put them in the correct order by numbering them 1 to 7.

4 King Street
Glasgow W6 9PQ
Scotland
2nd January

Dear Halima,

☐ After a few dances, we looked at the time. It was nearly midnight. We all stood in a circle looking at the clock. Ten seconds before midnight, we started counting: "Ten, nine, eight, seven, six, five, four, three, two, one." We all held hands and sang the famous Scottish song 'Auld Lang Syne'. That means Old Times Long Ago. We went to bed at about two in the morning.

☐ After dinner, we pushed all the furniture to the side of the room to do Scottish dancing. My father and my brothers were all wearing their kilts - that's a kind of Scottish skirt that men wear for parties. And my Uncle Craig played the bagpipes. Bagpipes are a Scottish musical instrument. They make a strange sound a bit like a baby crying.

☐ Anyway, now I'm going to tell you all about our New Year's Eve celebrations. You probably know that New Year's Eve (evening) is on the 31st of December and New Year's Day is January 1st. Most people in Britain stay up until midnight on New Year's Eve. That's what we did.

☐ I must stop now. It's time for my first swim of the new year! Please write to me and tell me something about a traditional celebration or festival in your country.

1 Thank you very much for your New Year greetings. It was really nice to hear from you. I had a great time this New Year. We had a lot of relations visiting us from Australia so it was really special this year. I've only met my Australian cousins twice before. It's too far away for them to come to Britain very often.

☐ The next day was New Year's Day. I woke a bit tired after the late night and immediately started to think about New Year's resolutions. My brother has made a resolution to work harder at school. I have made two resolutions this year - one is to go swimming more often. The other is to visit my grandmother every week.

☐ We started our New Year's Eve party with a big meal - roast lamb, roast potatoes, carrots and lots of other vegetables. Then we had dessert. There was chocolate cake with ice-cream and apple pie. I ate too much!

All the best,
Kirsty

In China there are now 310 million users – about 25% of the total population. India has 44.5 million users and Russia has 60 million users.

④ ____. After the earthquake and tsunami in December 2004, hundreds of people were found and rescued in Sri Lanka because of their mobiles. Rescue workers were able to trace them even when the people did not know where they were. Families could get in touch with loved ones using mobile phones when landlines were no longer working.

⑤ ____. Of course, it can be very annoying when someone's mobile phone rings in a film, a concert or even an exam because the owner has forgotten to turn it off. But there are much more serious problems. A lot of car accidents have been caused by drivers talking on their mobiles. In most countries it is now illegal to use a mobile while driving a car unless it is 'hands-free'. (That means that you don't hold the mobile in your hand.) But many people think that even hands-free mobile phones are dangerous in cars. They say that drivers don't think about the road and the traffic if they are talking on a mobile. They say it is different from talking to another person in a car. Another person in the car can see the traffic problems and will stop talking when the driver is in difficulty. But someone on the phone can't see the driver's situation.

Love them or hate them, mobile phones are here to stay. ⑥ ____. You can use them to make videos, take photos, connect to the Internet and send e-mails, download music and even watch TV. They are completely different from the Swedish police mobiles of 1946!

Why we should recycle

by Professor Khaled Al Jaber

People ask, 'Why should we recycle things?' They say that recycling makes a lot of extra ① ____________ – we have to take our rubbish to different bins. And things like paper and glass are ② ____________, so what's the problem? Well, I say to those people: there are two good reasons why we should recycle paper, glass, ③ ____________ – and perhaps other things, too. The first reason is this: the rubbish dumps near our towns and cities are getting ④ ____________ every year. These dumps are dirty and dangerous. We are ⑤ ____________ the beauty of our country.

The second is an economic reason: let's take paper as an example. To make paper, they cut down trees in Norway or Canada, a very long way away. They make the paper, and then they carry it ⑥ ____________ of miles to us – that uses a lot of oil. We use the paper once, and then we ⑦ ____________ it away. Instead, we should use the old paper to make new paper; it is a cheap and easy ⑧ ____________. If we do this, we will save money and protect the ⑨ ____________.

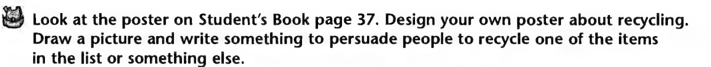

B 🎧 43 **Listen and check your answers.**

C **Match the sentences.**

1 Each team got two goals in the semifinal.

- mobile phones
- computers
- clothes
- batteries
- paper

Lesson 6

A **Here is a letter to the newspaper from the Green Oil & Gas Company. Complete it with words from the Student's Book.**

Dear Editor,

Last week's letter from Mr Ahmad was interesting. I am very pleased that I can answer his question.

Protecting the ① ____________ is extremely important to us. We ② ____________ the quality of the air near our industrial sites: for example, we ③ ____________ the quantity of sulphur dioxide and ozone. We also monitor carefully the quality of the ④ ____________ near our sites – to protect fish, birds and so on.

Around Burjussia we have provided ⑤ ____________ places for birds, which is helping to restore their breeding patterns. We also help protect the wildlife in the lakes around Rumeila, for example, by carefully ⑥ ____________ the quality of the lakewater.

Mr Ahmad is right when he says that the use of oil and gas causes climate ⑦ ____________. But does he know that LNG produces much less CO_2 than oil? If people use LNG instead of oil, that will reduce the ⑧ ____________ of CO_2 going into the air.

We hope this answer will be helpful to Mr Ahmad and other readers.

Yours sincerely,

Eman Hashemi
(Environment and Conservation Department)

B **Work in groups. Read this part of Mr Ahmad's letter again:**

Look at different places in Basra, like Shu'ayba, Zubeir, Rumeila and Burjussia. I remember Rumeila as it was in the early nineties. It used to be a lovely, quiet place, full of wildlife, especially in the lakes. I went there two years ago and I saw how industrial development has changed the area. I expect I would notice more changes if I went there today.

Talk about these questions. (Your teacher will be able to help you with the first one.)

Has your town changed a lot? What is it like now? Do you think it's going to change in the future? Do you think it's getting better or worse?

How can we reduce pollution from cars in cities?

- use hybrid cars
- use lead-free petrol

E **You are going to write an essay with the title: *How can we reduce pollution from cars in cities?* In the essay you will present several solutions to the problem of pollution. How can you join the different parts of the essay? Read the essay below and look at the underlined words and phrases.**

How can we solve the problem of overfishing?

The North Sea around Britain used to be one of the richest seas in the world for fish. But now there is a problem. There has been too much fishing, and now the fish are almost all gone. Pollution in the water has made the situation worse – fish cannot breed in dirty water. What is to be done?

One possible solution is to stop fishing completely for a few years. This would give the fish time to breed and increase their numbers. But, of course, this would be terrible for fishermen. They would lose their jobs.

An easier solution might be to reduce the quantity of fish that we catch. Then fish and fishermen could survive.

There is another way forward: fish farming. It is possible to breed some types of fish in fish farms. If we do this, we don't need to catch wild fish.

Something else that we must do is stop the pollution in the North Sea. Even if we are not fishing, it is important to have clean seawater – for people and for animals.

Plan and write the essay *How can we reduce pollution from cars in cities?* Use words and phrases from the essay above to organize your writing.

Revision 1

A **The paragraphs in this essay are in the wrong order. Put them in the correct order by numbering them 1 to 4.**

☐ ____________________

In the past we hunted animals in a natural way, but we now have something that is not very natural – guns. So wild animals cannot escape from us. Many animals have become extinct because of hunting, such as the dodo in Mauritius. It's too late to save them now. But we should learn the lesson: hunting can destroy whole populations of animals. If we don't protect endangered animals like the elephant, the mountain gorilla and the rhino from hunters, they will disappear completely.

☐ ____________________

In the UK there is currently a lot of debate about fox hunting – for and against it. But the fox is not the only animal that is hunted – people shoot rabbits, deer and many different birds. Around the world, thousands of different animals are hunted, for food or for sport. **Is this a normal part of life, or should we try to protect wild animals from the hunters?**

☐ ____________________

So, there are two separate answers to the question. **On the one hand,** hunting is a perfectly good way of getting food – when there are lots of animals to hunt. We should not worry about rabbits and pigeons. **On the other hand,** we must do everything we can to protect endangered animals. We must stop hunters killing them, whether for sport or for food. Otherwise, we will lose these wonderful wild animals forever.

☐ ____________________

Of course, not all wild animals are endangered. In the UK, there are lots of pigeons, rabbits and deer. These animals are hunted for food. Perhaps this is a better way of getting our meat than farming. These wild animals have a much better life than the animals in farms. And shooting is not a very cruel way to kill an animal – at least it is quick.

B **Now match these functions to the paragraphs. Write them in the spaces provided.**

- Introduction
- For hunting
- Against hunting
- Conclusion

C **Work in groups. You are going to write an essay with the title:** ***Zoos – for and against.*** **Close your books and brainstorm the topic – write down all the ideas about zoos you can think of (for and against).**

D **Look at the list of ideas from a brainstorm. Compare these ideas with your list from Exercise C. How many points are the same?**

For

- Fun for all the family.
- Educational – you learn a lot.
- Scientists can study the animals.
- If people see animals, they will want to protect them.
- Children may decide to study Biology.
- Zoos can breed endangered animals and put them back into the wild. They can save endangered animals.

Against

- Smelly and boring.
- Better to see the animals on TV/in the wild.
- The animals are unhappy. They walk up and down. Some seem to go mad.
- They are wild animals, but they are not "in the wild".
- They don't behave in their normal way.
- People make a noise, hit the glass boxes, take flash photos – they disturb the animals.

E **Now plan your essay** ***Zoos – for and against.*** **Your essay should have four sections, like the essay in Exercise A:**

1 Introduction
2 One side of the argument
3 The other side of the argument
4 Conclusion

Write the full essay in 100–150 words. If you have any photos that show the good or bad things about zoos, attach them to the essay.

Test 2

Ask any British teenager about their favourite food and they will probably say one of these: fish and chips, pizza, burgers, kebabs, hot dogs or Mexican tacos. What do these things have in common? They are all fast food. That means food from shops or stalls that only sell one or two kinds of food, which is served very fast, and which doesn't cost a lot. In fact, 80% of British teenagers eat fast food at least once a week.

Why do they like it so much?

'I like to go out with my friends at the weekends. We go to the cinema and the shops and then we get hungry,' says Damian, aged seventeen from Brighton. 'We can't afford restaurants and, anyway, they're too formal for us. Fast food is cheap and you don't have to be smartly dressed to go and buy a portion of fish and chips.'

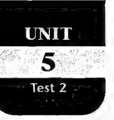

Adam, eighteen from Newcastle, says he eats fish and chips at least once a week. 'My brother and I always go swimming on Wednesday evening. Afterwards, we're tired and hungry, so we get fish and chips from a shop opposite the pool. It's quick and convenient. You don't have to wait. You get a hot meal in five minutes. And we eat them on the way home in the bus. The chips are a bit oily, but when you're hungry, that's OK.'

There's no question that fast food is convenient and cheap, but many doctors and scientists think that it is unhealthy. In Europe and America today, 22% of children and teenagers are overweight. Doctors say that fast food is the problem. They claim it contains too much fat and too much oil. It also contains too much salt, which makes people thirsty. This leads to another problem. The soft drinks like lemonade, orangeade and cola which are sold with fast food contain too much sugar. The result is that young people fill themselves with sugar, oil and fat, very little carbohydrate and protein, and no vegetables or fruit.

Psychologists say that fast food can be bad for family life. They say that families suffer when teenagers are never at home at mealtimes. They say that families need to spend time together enjoying a meal. Mealtimes are the time when the whole family has the opportunity to get together and talk about the events of the day.

Environmentalists complain about fast food's bad effects on the environment. It comes with plastic knives and forks, plastic cups and bottles and polystyrene or paper boxes. Many people throw these away without thinking and leave rubbish in the streets. On top of that, burning them causes extra pollution to the atmosphere.

However, it is clear that fast food is not going to go away. How can we reduce the negative aspects of it? Firstly, for health reasons, we shouldn't always eat the same fast food. Even if burgers and chips are your favourites, you shouldn't always eat them. Have something different for a change sometimes. You should avoid sweet drinks with your fast food. Drink water instead. You should make sure you have a meal with the whole family at least four times a week. For the sake of the environment, avoid buying fast food that has a lot of polystyrene or plastic wrapping. And always make sure you throw your fast food wrappings and cups in a rubbish bin.

4 **THE ARAB WORLD BROUGHT CLOSER TOGETHER BY SATELLITE TV** ☐

From our media correspondent
Mariam Azzawi

In many parts of the world – the Middle East, China and Europe, for example – satellite dishes on roofs or in gardens are a common sight. Programmes in different languages from countries all over the world can be seen on one TV set. Because we are used to this, it is easy to forget that it is quite a new thing.

How long have we had satellite TV? Well, let's go back to the beginning of the story. You could say that it all started when the Russians sent the first satellite into space – the Sputnik in 1957. That was an experiment to test the technology. It went round and round the Earth, not doing much.

The first communication satellites were launched in 1963, but these also moved round the Earth. That is not good for communication – you can use the satellite for a few hours and then it disappears. Two years later, the problem was solved. *Early Bird* (correct name *Intelsat 1*) went round the Earth at the same speed as the Earth itself goes round, so it appeared to stay still. The distance of *Early Bird* from the Earth was 37,000 km – the same as today's communication satellites.

At first, these satellites were used by TV companies to send news and sport programmes long distances, for example, across the Atlantic. People in their homes continued to receive their TV in the normal way, with an aerial.

In the early 1980s, people started to get satellite dishes at home and to receive programmes from satellite TV stations. People soon understood the great advantages of this system. With satellites, you can receive TV programmes in the middle of the desert, in the mountains, or on small, faraway islands. You can get your programmes from stations in other countries. As a result, more people can receive TV and everyone gets more choice.

Arabs living in London, for example, can receive lots of Arab satellite stations. This means they can keep in touch with news and culture from home. People in China can get news from international TV companies, not just their own government station. Viewers all over the world can watch Al-Iraqia, based in London, or CNN, the American news station. If you are studying Spanish, English or Chinese, television is a wonderful way to learn the language.

Satellites have changed the way we watch television. They have opened up the world and brought people closer together. They may be a new technology, but they are going to be with us for a very long time.

INDIA'S SHINING STAR

Here at the French Open Championship in Paris yesterday, we saw one of this year's most exciting matches.

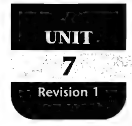

The eighteen-year-old Indian star Vidya Patel got through to the quarter-finals by beating Carmen Sanchez, from Venezuela, who is twelve years older.

Miss Patel looked confident from the start of the match, although she had never beaten the Venezuelan before. She has a beautiful serve, fast and accurate, which often went straight past Miss Sanchez. Her fastest serve was 158 kph. Throughout the first set, the older woman looked uncomfortable, unable to find any answer to the brilliant serve and volley of her opponent, and lost 3-6. Although Carmen is a favourite with the crowd here in Paris, you could feel the support for the young Indian player increasing as the match went on. We were all most impressed with her style and confidence.

In the second set, Miss Sanchez fought back bravely. She had a look of calm decision in her eyes. She seemed to be saying: I have more experience – I will show you! She won the set 7-5. In the third set, however, she once again lost heart. After a few games, she

appeared to give up. Miss Patel played brilliantly and finished off the set at 6-2, after one hour and 47 minutes. This young player is going to be one of the great stars of women's tennis.

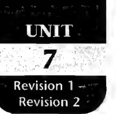

Vidya Patel is from India. She is 18. (= 2 facts)

Test 2

A Read the article and choose the best title.

- ☐ **LONDON'S MOST FAMOUS STORE**
- ☐ **ONLY FOR MILLIONAIRES**
- ☐ **THE BEST SHOP IN THE WORLD**
- ☐ **Where to buy expensive food**
- ☐ **London's most expensive shoes**

Without a doubt, Harrods is London's most famous department store. It is situated in Knightsbridge, one of London's most expensive areas.

Harrods, which was founded in 1834 by Charles Henry Harrod in east London, was moved to its current site in Knightsbridge, central London, fifteen years later. To begin with, the shop was just one room with two shop assistants and a messenger boy. By 1880, Harrod's son, Charles Digby, had built up the business so that the shop sold medicines, perfumes, notebooks and paper, fruit and vegetables. In 1883, there was a fire and the shop burned to the ground. A new building was immediately constructed, however, and since then Harrods has gone from strength to strength.

Today Harrods is a huge department store with 35,000 customers every day. During the sales, there are 300,000 customers a day. The shop has 4,000 people working in the store. The food department sells 250 different kinds of cheese and 130 different types of bread. The confectionery department sells 100 tonnes of chocolate per year. The exterior of the store is lit by 12,500 bulbs and 300 of them have to be changed every day.

Harrods has a motto which is 'Everything for Everybody Everywhere'. If you are rich enough, you can buy diamond-covered shoes which cost a million pounds! And there are many more true stories about unusual things which have been sold to important customers. In the early 1900s, wealthy customers could even buy planes and sailing boats from Harrods. Of course they had to be ordered first, then paid for, then delivered. Later, in the 1930s, Harrods had on show one of the world's first television sets. The famous British writer, Noel Coward, was once given an alligator which had been ordered and bought at Harrods as a Christmas gift. The American president, Ronald Reagan, was given a baby elephant which had been bought at Harrods. The British film director, Alfred Hitchcock, used to have his favourite fresh fish flown out to him in America by Harrods.

While it is true that Harrods sells just about anything you could want, it is one of the most expensive shops in Britain. So perhaps Harrods should change their motto to 'Everything for Everybody **Rich** Everywhere'!

Test 2

A **Read the text and tick the four topics the article tells us about.**

1 conditions needed for growing rice ☐

2 rice-growing methods in Asia ☐

3 the price of rice ☐

4 traditional uses of rice ☐

5 growing rice in Europe ☐

6 growing better rice ☐

Did you know that rice is eaten by half the world? Every year about 600 million tonnes of it are harvested. Most of the world's rice is grown in China, India and Indonesia. China produces 31%, India produces 20% and Indonesia produces 9% of the world's rice.

Rice has to be grown in warm, wet conditions. It takes between 110 and 200 days to mature. While it is growing, it needs to be kept wet. For this reason, it is usually grown on flat land in places which have a long rainy season. It can also be grown near rivers that flood, such as the Nile in Egypt.

In most of Asia, the traditional methods of cultivating and harvesting rice by hand are still practised. Animals such as water buffalo are used to prepare the rice fields. At the same time, rice seeds are planted in seedling beds. After 30 days, the small rice plants are moved to the rice fields. If it does not rain during the growing season, the land has to be watered by hand. In fact, it takes 5,000 litres of water to produce just one kilo of rice.

Rice is not always used as food. It is also used in traditional ceremonies. In Bali, Indonesia, they often put a little rice on banana leaves to be eaten by ghosts! In Japan, dry rice plants are placed over the doors of houses to keep ghosts away. In India, rice is thrown at the bride and her husband at weddings. It is thought it will bring luck to the couple who are getting married. This is also done at weddings in Europe and the United States.

Because of Asia's rising population, rice production has to be increased by 60% by the year 2020. The rice plant will therefore have to be improved. Scientists are trying to find a type of rice that can be grown on less land with less water. Many different methods are being used to improve rice seeds, including genetic engineering. Nobody is quite sure how many varieties of rice exist at the moment, but it is thought that there are probably around 140,000 different types. Scientists are confident that the perfect variety of rice plant will be produced soon. It will be one which does not need too much water or land and which grows fast and produces a large amount of rice.

The topics featured reflect the age and interest of the students and draw upon their knowledge and experience of the world. The Student's Book also includes a Grammar and Functions Reference section, giving detailed explanations and examples of the language points covered in the course, and a Literature Focus.

The Activity Book contains stimulating activities to consolidate vocabulary and grammar, develop phonic awareness and practise the four skills. The students have the opportunity to personalize the language presented in the Student's Book, take part in communicative speaking activities and carry out structured writing tasks. The Activity Book also has end-of-unit tests that can be used to monitor the students' progress.

The Teacher's Book contains an introduction with practical advice and procedures for using the course effectively. The underlying methodology is explained, and the teaching techniques used in the course are highlighted.
